How to play online!(not lan)

step 1 dowloand hamachi for server

step 2 make a server and add you friend to hamachi server you just made

step 3 go to steam choose the game then rightclick>settings>gamefiles

then you will see a file called 'Online host' click that and then run the .exe file, select a map firts

astly let your friend open the game regularly and click multiplayer>online and use hamachi server ip

-----  
How to play online!(lan)

if you are at same internet who you play with just do this 2 steps

step 1 go to steam choose the game then rightclick>settings>gamefiles,press 'Online host' and run exe

step 2 get your private ip(it usualy like this 192.168.X.XXX) and the use that as a ip

there are more alternative versions like port forwarding but we recommend doing these instead
